OBJECTIVE

Third-year Computer Science student at FAST-NUCES with interests in AI, machine learning, and full-stack development. Experienced in building intelligent, data-driven applications through multiple internships. Seeking internship or full-time opportunities to contribute to impactful technology solutions.

EDUCATION

BS Computer Science

2023 – Present

FAST – National University of Computer & Emerging Sciences, Karachi, Pakistan

EXPERIENCE

Full-Stack Development Intern — Developerhub Corporation (Remote)

Feb 2026 – March 2026

- Worked on full-stack web applications using modern JavaScript frameworks, REST APIs, and cloud-based authentication.
- Gained exposure to WebSockets, payment gateway integration, and cloud deployment workflows.

AI Intern — Apexcify Technologies (Remote)

March 2026 – April 2026

- Completed applied AI tasks covering NLP, image classification, and real-time object detection and tracking.
- Worked with Python, TensorFlow, OpenCV, NLTK, and scikit-learn across multiple projects.

Lab Demonstrator — Programming Fundamentals (PF) — FAST-NUCES, Karachi

Aug 2025 – Present

- Conducted Programming Fundamentals labs, guiding students in C/C++ programming, debugging, and algorithm design.

Teaching Assistant — Digital Logic Design (DLD) — FAST-NUCES, Karachi

Feb 2025 – May 2025

- Assisted students with digital logic design, Boolean algebra, and circuit concepts while evaluating assignments and quizzes.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, C++, SQL, HTML5, CSS3

Frontend: React.js, Next.js (App Router), Vite, TailwindCSS, Responsive Design

Backend & APIs: Node.js, Express.js, Flask, FastAPI, RESTful APIs, JWT Authentication, Socket.IO, Firebase, Supabase

Databases: MySQL, PostgreSQL, MongoDB, Firebase Realtime Database

AI & Machine Learning: TensorFlow, Keras, Scikit-Learn, NLTK, YOLOv8, OpenAI API, Hugging Face, TF-IDF, Cosine Similarity

Tools & Platforms: Git, GitHub, Docker, Vercel, Render, Streamlit, Gradio, Stripe, Swagger, n8n, CI/CD Pipelines

PROJECTS

Nexus — Investor-Entrepreneur Collaboration Platform — React · Node.js · MongoDB · Socket.IO · Stripe

- Built a collaboration platform with e-signatures, real-time video (Socket.IO), and conflict-aware meeting scheduling.
- Integrated Stripe payments, 2FA OTP, JWT auth, and 18+ REST APIs; deployed on Vercel and Render.

FastTrack — Student Carpooling Platform — React · Flask · Oracle 11g · JavaScript

- Developed a full-stack carpooling platform with authentication, booking workflows, and role-based access control.
- Integrated Oracle 11g with optimized SQL queries and designed clean REST APIs.

Image Classification System — TensorFlow · MobileNetV2 · Flask · React

- Built a deep learning web app using MobileNetV2 for classifying images with top-3 predictions via Flask API.
- Developed a glassmorphism React UI with drag-and-drop upload for seamless interaction.

Real-Time Object Detection & Tracking — Python · YOLOv8 · OpenCV · ByteTrack

- Built a real-time object detection system (~30 FPS) tracking 80 COCO classes using YOLOv8 and ByteTrack.
- Implemented tracking IDs, bounding boxes, labels, and confidence scores from live video.

Sentiment Analysis Web App — FastAPI · React · NLTK VADER · Recharts

- Developed an NLP app classifying sentiment (Positive, Negative, Neutral) using NLTK VADER with FastAPI backend.
- Built a React dashboard with Recharts for real-time sentiment visualization.
